Saint Petersburg, FL 33702

Dear Thinking Systems:

Congratulations on your inclusion in the *KLAS 2005 Top 20 Best in KLAS Report*.

This report is a reflection of the performance of vendors and professional service firms over the past year as reported by the 4,500 hospitals and 2,500 plus clinics in North America who regularly share their opinion with KLAS.

The performance data in the *Top 20 Best in KLAS Report* is a resource used by provider organizations in making software and service decisions. It also serves as an invaluable resource for software vendors and professional service firms seeking to continually improve their products and services and to investment firms as an aid in decision making.

This semi-annual *Top 20 Best in KLAS Report* provides a summary of the in-depth results available through the Platinum KLAS database at www.healthcomputing.com.

If you need more details or have specific questions, please do not hesitate to contact me at (801) 226-5120.

Sincere regards for continued success throughout this next year.

Kent Gale
President
KLAS Enterprises
